Meat Processors Survey

Executive Summary

- Over half (55%) of Canada's meat processors report not being able to fill positions or experience chronic recruitment challenges. A further 21% occasional or seasonal challenges recruiting qualified workers. Greatest challenges reported in Quebec and BC among mid to large sized processors.
- Meat processors cited: Meat cutters, plant management & supervisors, slaughterers, butchers and production labourers as the top key occupations. Recruitment challenges for Meat cutters and butchers were cited most often across most regions of Canada
- Canada's Meat processors hired an estimated 24,500 workers over the past year. This represents a 41% turnover rate in the industry for key occupations.
- Meat processors also reported an average vacancy rate of 12.4% the equivalent <u>7,300</u> vacant positions across Canada.
- 8% of employers, representing 35% of the workforce, reported utilizing the Temporary Foreign Worker Program over the past year.
- The "average" processor in Canada employs 102 workers, but 45% employ less than and 10% employ 200+. Over one-third, 35% of positions, are filled by Women and 10% filled by recent immigrants.
- In total, n=417 meat processing employers participated in the survey administered by Ipsos. Data collection was conducted via a telephone (n=299) and online (n=118) surveys between December 30th, 2017 and April 23rd, 2018. Meat processors surveyed employed a total of 45,300 workers, representing an estimated 75% of the total industry workforce.

- Methodology

Real Challenges. Practical Solutions. Fresh Perspectives.

- n=417 meat processing employers surveyed.
- Meat processors surveyed employed 45,300 workers, or 75% of the total industry workforce*.
- Representative distribution across regions and segments.

75%

* According to the 2016 Census Canada's Meat product manufacturing industry (NAICS 3116) employed 59,290 workers in 2016

There is significant overlap in activities and animal types

- Overwhelming majority (75%) of processors are involved in multiple processing activities and animal types
 - 8-in-10 are involved in Meat cutting
 - Three-quarters involved in Further processing
 - Almost half (47%) in Abattoirs/Slaughter

Activity Type	Number of respondents (%)
Abattoirs/Slaughter	195 (47%)
Meat cutting	335 (80%)
Further processing	304 (74%)
Total	417

Facilities performing multiple activities, share of total

Meat Workforce Survey Findings | June 2018

Processing Activity Activity by Province 32 42 British Columbia / Territories 30 76 Western Canada 86 35 140 Ontario 62 Quebec 29 Atlantic Canada 16 20 40 60 80 100 120 140

Further processing (e.g. products such as sausage)

- Meat cutting (quartering, initial cuts of meat, and retail cuts)
- Abattoirs / Slaughter

Regional differences in processing activity:

- Western Canada (62%), British Columbia(63%) and Atlantic Canada(68%) have the largest concentration of Abattoirs
- Ontario and Quebec concentrated in Meat cutting and Further processing

Activity by Province

- Abattoirs / Slaughter
- Meat cutting (quartering, initial cuts of meat, and retail cuts)
- Further processing (e.g. products such as sausage)

Animal Type

- 76% of facilities process Pigs (hogs), 70% Beef Cattle, and 66% Chickens or Poultry
- Saskatchewan is among the most diverse processors pigs, beef, lambs/sheep and other live stock
- Higher concertation of Chicken and other poultry processors Quebec and Atlantic Canada

Meat Workforce Survey Findings | June 2018

Processor Export Markets

Share (%) of Processors that Export, by Province

- Overall,16% of processors export to the US and 13% export internationally, while 31% export to other provinces
- 42% of Quebec's processors export to the US, compared to only 4% in BC
- Pig (hog) processors are most likely to export to the US and internationally
- 58% of large processors with 200+ employees export to the US, 69% to other international markets

Meat Workforce Survey Findings | June 2018

E

Workforce – Employment Size

Average Processor Employment Size

Processors are stratified across small, medium and largeFPSC facilities:

- The "average" processor in Canada employs 102 workers, but average is uncommon.
- 45% employ less than 10 (averaging 5.8 workers), while 10% employ 200+ (employing an average of 670 workers)
- On average, largest processors are Poultry and Hog plants, abattoirs/slaughter facilities and those in Quebec and Western Canada

Meat Workforce Survey Findings | June 2018

Permanent Full-time Employment Share

By Region

80% of meat processor workforce is made up of permanent full-time positions:

Chicken processors report the highest share of permanent workers at 86%, while hog and pig processors reported a full-time employment share of 73%.

Question: Over the past year, on average, how many paid positions were permanent full-time?

Meat cutters, plant management & supervisors, slaughterers, butchers and production labourers are the top key occupations for meat processors.

Question: What are the top key occupations, or specific job titles for workers, at your plant? By key occupations we mean either occupations employed in the largest numbers, those with the most specialized skills or those generally most critical to production.

Top key occupations, % of respondents

Meat Workforce Survey Findings | June 2018

© Food Processing Skills Canada

Occupational Profile:

- Production labourers* account for one-third (35%) of industry employment,
- General (10%) and specialized (10%) meat cutters are another onefifth(20%)

*included poultry and other production labour

FPSC

Workforce Profile

 On average, 12% of meat processing positions were vacant over the past year, the equivalent of 7,300 positions across Canada.

On average, meat processors reported:

- 34% filled by Women
- 10% filled by recent immigrants
- 3% filled by TFWs

Meat Workforce Survey Findings | June 2018

Workforce Profile - Vacancies

Vacancies as a share of average positions

Vacancies are most acute in Quebec, least likely in Alberta :

- Quebec processors reported that highest vacancy rates at 19%; Western Canada the lowest (5%)
- Highest among processors employing 120 to 200 workers

Vacancies as a share of average paid positions

FPSC

 Over half (55%) of Canada's meat processors report not being able to fill positions or experience chronic recruitment challenges.

Workforce Availability

Recruitment Challenges:

- A further 21% occasional or seasonal challenges recruiting qualified workers
- In total, 78% report some form of challenges recruiting or retaining qualified workers.

Question: How would you describe the general availability of workers you need? Would you say that you are...?

FPSC

Recruitment challenges most severe in BC and Quebec:

- Almost 4-in-10 processors in BC report not being able to fill positions.
- 70% of meat processors in Quebec report not being able to fill positions(25%) or experience chronic recruitment challenges(45%).

Question: How would you describe the general availability of workers you need? Would you say that you are...?

Experiencing immediate and persistent challenges recruiting and retaining qualified workers, vacant positions go unfilled

- Experiencing ongoing challenges recruiting or retaining qualified workers
- Experiencing occasional or seasonal challenges recruiting or retaining qualified workers
- Experiencing no significant challenges in recruiting or retaining qualified workers from the local workforce

Workforce Availability

Abattoirs/Slaughter processors report the greatest recruitment challenges:

 Almost one-third (31%) of Canada's Abattoirs/Slaughter processors cannot fill positions or experience chronic recruitment challenges. A further 30% occasional or seasonal challenges recruiting qualified workers

Experiencing immediate and persistent challenges recruiting and retaining qualified workers, vacant positions go unfilled

Experiencing ongoing challenges recruiting or retaining qualified workers

- Experiencing occasional or seasonal challenges recruiting or retaining qualified workers
- Experiencing no significant challenges in recruiting or retaining qualified workers from the local workforce

Question: How would you describe the

The largest facilities report more pressing hiring challenges than the smaller ones:

- Over half (54%) of Canada's meat processors with between 121 and 200 workers cannot fill positions or experience chronic recruitment challenges.
- Three-quarters (75%) of Canada's largest meat processors report not being able to fill positions or experience chronic recruitment challenges

Workforce Availability

Experiencing immediate and persistent challenges recruiting and retaining qualified workers, vacant positions go unfilled

Experiencing ongoing challenges recruiting or retaining qualified workers

Experiencing occasional or seasonal challenges recruiting or retaining qualified workers

Experiencing no significant challenges in recruiting or retaining qualified workers from the local workforce

Meat processors have difficulties recruiting Meat cutters and butchers across most regions of Canada:

 4-in-10 processors cited Meat cutters/ butchers as the most difficult to recruit, 6-in-10 in BC and over half in Western Canada.

Rank	Occupation	Overall	Atlantic Canada	Quebec	Ontario	Western Canada	British Columbia
1	Meat cutter/ butcher	42%	53%	14%	43%	52%	60%
2	General labour/ Day labourer	11%	5%	8%	14%	9%	8%
3	Electromechanic/ electrotechnician	6%	5%	26%	-	2%	-
4	Production worker	5%	-	5%	7%	3%	6%
5	Sanitation/ Maintenance	5%	11%	10%	4%	3%	2%
6	Supervisor/ manager	5%	-	10%	2%	5%	4%
7	Meat wrapper/ packaging	4%	-	5%	5%	2%	4%
8	Food processing operator	3%	5%	12%	1%	1%	-
9	Deboner	2%	-	4%	2%	2%	-
10	Sausage maker	2%	-	-	2%	4%	2%
11	Driver/ shipper	2%	5%	3%	2%	1%	-

Question: What are the top three positions that are most difficult to recruit?

Evidence of significant recruitment challenges supported by high turnover.

- Canada's Meat processors hired an estimated 24,500 workers over the past year. This represents a 41% turnover rate in the industry for key occupations.
- New hires in Quebec totaled 56% of total reported plant positions.
- Employers with between 120 to 200 workers, reported hiring 80% of their workforce over the past year.

Turnover rate, by Province

Note: Turnover rate = (total number of people hired in an occupation)/(average number of people employed in an occupation)

Question: Excluding seasonal re-hire, how many workers were hired for this position over the last year?

Turnover rate, by employer size

80%

90%

Top occupations by turnover rate, meat processing

- The number of total hires of Poultry killers and slaughters is almost equal to total average employment over a single year.
- Foreman/women and other meat cutting staff have the lowest turnover rates while saw machine operators and other poultry staff have the highest.

Note: Turnover rate = (total number of people hired in an occupation)/(average number of people employed in an occupation)

Utilization of programs :

Survey highlights:

- 8% of employers utilized the Temporary Foreign Worker Program over the past year.
- 4% hired through the Provincial Nominee Program.

 Employers participating in TFW or PNP programs are much more likely to report inability to fill vacant position.

Recruitment challenges based on participation in PNP/TFW program

Meat Processors Survey

Methodology

- In total, n=417 meat processing employers participated in the survey administered by lpsos.
- Data collection was conducted via a telephone (n=299) and online (n=118) surveys.
- The survey was fielded between December 30th, 2017 and April 23rd, 2018.
- The margin of error for a sample of n=417 is +/- 4.7%, nineteen times out of twenty. The margin of error will be greater for sub-groups depending on sample sizes.
- The average length of the survey was 21 minutes via telephone and 33 minutes via online.
- Respondents were screened to ensure that only those individuals who had detailed information about the people employed within the organization and the types of skills and qualifications required by the organization participated in the survey.
- The survey was conducted in both English and French, depending upon the preference of the respondent.
- Respondent contact information for the survey was provided by FPHRC.
